Perspective/Overview

Creating a culture of health in the community

The Action Cycle shows how to create healthy communities. The rankings later in the document assist in understanding what makes a healthy community.

The Community Health Needs Assessment (CHNA) uses systematic, comprehensive data collection and analysis to define priorities for health improvement, creates a collaborative community environment to engage stakeholders, and an open and transparent process to listen and truly understand the health needs of the communities served by Huggins Hospital.

Action Cycle Source
Source: the Robert Wood Johnson Foundation’s County Health Rankings website:
http://www.countyhealthrankings.org/roadmaps/action-center
Huggins Hospital, as the sponsors of the assessment, engaged national leaders in community health needs assessments to assist in the project. Stratasan, a healthcare analytics and facilitation company based out of Nashville, Tennessee, provided the analysis of community health data, facilitated the focus groups, conducted the interviews and facilitated a community health survey to receive community input into the priorities and brainstorm goals and actions the community could take to improve health. This document is a hospital facility-specific Community Health Needs Assessment (CHNA) for Huggins Hospital.

- Huggins Hospital’s Board of Trustees will approve and adopt this CHNA and an implementation strategy in 2019.
- Starting on September 28, 2019, this report was made widely available to the community via Huggins Hospital’s website, www.hugginshospital.org, and paper copies are available free of charge at Huggins Hospital.

Participants

Three hundred forty-three individuals collaborated to implement a comprehensive CHNA process focused on identifying and defining significant health needs, issues, and concerns of Carroll County and other communities served by Huggins Hospital. Over 40 people participated in focus groups, and 300 additional people participated in the community survey. The three-month process centered on gathering and analyzing data as well as receiving input from persons who represented the broad interests of the community to provide direction for creating a plan to improve the health of the communities.

Project Goals

1. To continue a formal and comprehensive community health assessment process which allows for the identification and prioritization of significant health needs of the community to assist with resource allocation, informed decision-making and collective action.

2. To initiate a collaborative partnership between all stakeholders in the community by seeking input from persons who represent the broad interests of the community.

3. To support the existing infrastructure and utilize resources available in the communities to instigate health improvement.
Community

Input and Collaboration

Data Collection and Timeline

In May 2019, Huggins Hospital began a Community Health Needs Assessment for Carroll County and other communities served by Huggins Hospital, seeking input from persons who represent the broad interests of the community using several methods:

- 43 community members, not-for-profit organizations representing medically underserved, low-income, minority populations, the elderly, health providers, education providers, the state health department and local public health network participated in six focus groups for their perspectives on community health needs and issues on July 24, 2019.
- 300 landline, cell phone and online surveys were conducted from June 19 to July 15th, 2019.

Information Gaps

While this assessment was quite comprehensive, it cannot measure all possible aspects of health in the community, nor can it adequately represent all possible populations of interest. It must be recognized that these information gaps might in some ways limit the ability to assess all the community’s health needs.
Participation by those representing the broad interests of the community

### Participation in the focus groups and creating the Community Health Needs Assessment and Implementation Plan:

In many cases, several representatives from each organization participated.
Input of Public Health Officials

Carroll County Coalition for Public Health (C3PH) participated in the focus groups for this Community Health Needs Assessment process and our ongoing partners with Huggins Hospital in community health improvement. C3PH is a member of the Huggins Community Health Network Board and will be working with Huggins Hospital and the Network members to develop collaborative efforts toward the Community Health Needs Assessment's Implementation Plan.

Input of Medically Underserved, Low-Income, and Minority Populations

Input of medically underserved, low-income and minority populations was received during the focus groups and surveys. Agencies representing these population groups were intentionally invited to the focus groups. Additionally, the community survey was conducted using landlines, cell phones and online to reach as many types of people as possible including low-income, medically underserved and minority populations. The community survey was representative of the community surveyed – by age, income, and education.

Community Engagement and Transparency

Many members of the community participated in the focus groups. We are pleased to share the results of the Community Health Needs Assessment with the rest of the community in hopes of attracting more advocates and volunteers to improve the health of Carroll County and the communities served by Huggins Hospital. The following pages highlight key findings of the assessment. We hope you will take the time to review the health needs of our community as the findings impact each and every citizen in one way or another.

Huggins Hospital Study Area

Carroll County was the focus of the health data collection stage of the Community Health Needs Assessment process because many health rankings reports are determined by county and the majority of patients served by Huggins Hospital live within Carroll County. Northeastern Belknap and northern Strafford county community members were also included in collection of data through surveys as they are also served by Huggins Hospital. The community includes medically underserved, low-income and minority populations. All patients were used to determine the service area without regard to insurance coverage or eligibility for financial assistance under Huggins Hospital’s Financial Assistance Policy.
Key Findings
Community Health Assessment

Most Significant Community Health Needs

The following needs were defined during the 2019 Community Health Needs Assessment process, including the community survey, focus groups and secondary data. We have also included the needs defined in the 2016 process. The following pages display the data collected and the processes and methods used to complete the Community Health Needs Assessment.

<table>
<thead>
<tr>
<th>Needs identified by Focus Groups:</th>

<td>• Personal responsibility for health</td>
<td>• Children in poverty</td>
</tr>
</tbody>
</table>

The most significant health needs identified in the 2019 Community Health Needs Assessment process were:

1. Access to Care (including affordability)
2. Addiction Treatment and Prevention Services
3. Mental Health Services
4. Social Determinants of Health Improvement (Transportation/Housing)
5. Individual & Family Health Behaviors and Literacy
6. Healthy Aging

The needs identified in the 2016 process included substance use, mental health, chronic disease/obesity, access and aging issues.

Process and Methods

Both primary and secondary data sources were used in the CHNA.

*Primary methods included:*
- Community Focus Groups
- Community Survey

*Secondary methods included:*
- Public Health Data – death statistics, County Health Rankings, cancer incidence
- Demographics and Socioeconomics – population, poverty, uninsured, unemployment
- Psychographics – behavior measured by spending and media preferences

*The Medical Care Index is household-based, and represents the amount spent out of pocket for medical services relative to a national index of 100.

Source: ESRI
The population of Carroll County is projected to increase from 2019 to 2024 (0.31% per year). New Hampshire is projected to increase .55% per year. The U.S. is projected to increase 0.77% per year.

Carroll County had a higher median age (52.0 median age) than NH 43.1 and the U.S. 38.5. Carroll County percentage of the population 65 and over was 26.5%, higher than the US population 65 and over at 16%.

Carroll County had lower median household income at $57,598 than NH ($73,444) and the U.S. ($60,548). The rate of poverty in Carroll County was 9.3% which was higher than NH (7.7%) and lower than the U.S. (13.4%).

The household income distribution of Carroll County was 24% higher income (over $100,000), 56% middle income and 21% lower income (under $24,999).

The medical care index measures how much the populations spent out-of-pocket on medical care services. The U.S. index was 100. Carroll County was 105, indicating 5% more spent out-of-pocket than the average U.S. household on medical care (doctor’s office visits, prescriptions, hospital visits). NH's medical care index was 113, 13% higher than the U.S.

The racial and ethnic make-up of Carroll County was 97% white, 2% Hispanic Origin, 1% black, 1% mixed race, and 1% Asian/Pacific Islander. (*These percentages total to over 100% because Hispanic is an ethnicity, not a race.*)
2018 Population by Census Tract and Change (2018-2023)

Census tracts generally have a population size between 1,200 and 8,000 people, with an optimum size of 4,000 people.

The census tracts in the north in North Conway and in the South including Wolfeboro and Sanbornville had the most population with 5,000 to 6,999 in the census tracts.

Carroll County’s population was projected to increase from 2018 to 2023 at 0.3% per year. The eastern side of the county bordering Maine is projected to grow up to .5% while the western tracts are projected to decline in population with the exception of Center Harbor which is projected to grow up to .5%. The Wolfeboro tract is projected to increase between .51% to 1%, the fastest growing tract in the county.

Business Profile
Carroll County, New Hampshire

66.6% percent of employees in Carroll County were employed in:
- Accommodation & food services (25.5%)
- Retail trade (17.0%)
- Health care and social assistance (11.2%)
- Educational services (7.1%)
- Manufacturing (5.8%)

A few important business profile notes:
Retail, accommodation and food service jobs offer health insurance at a lower rate than manufacturing, healthcare, public administration and educational services. Also, Carroll County loses 1,106 net commuters per day commuting out of the county for work, with 5,299 commuting out of the county and 4,193 commuting into the county.

Source: US Census Bureau, American Community Survey (2009-2013)
These maps depict median age and median income by census tract. Looking at age and income by census tract is helpful to demonstrate all areas of a county are not the same. The health needs may differ in the Sanbornville census tract with a median age of 50 and the Wolfeboro census tract with a median age of 56 for example.

Looking at median household income by census tract also gives insight into health status. The lower income areas may different needs or experience different access issues than the higher income tracts. The lower income census tract was Ossipee with $49,000 median household income. The lower map is the number of households making less than $15,000 per year. The Ossipee census tract had 282 households making less than $15,000 per year.

Additionally, Carroll County’s May 2019 preliminary unemployment was 2.6% compared to 2.4% for New Hampshire and 3.6% for the U.S., which is a large decline in unemployment since 2014. These figures do not include those who have ceased looking for work and dropped out of the workforce. However, indications are these people have begun to reenter the workforce.
Health Status

The Health of the Community - Secondary Data

Health Status Data

The leading causes of death in Carroll County were cancer then heart disease, followed by accidents (unintentional injuries). Other major causes of death in Carroll County included respiratory diseases, stroke, Alzheimer's disease, suicide, diabetes, liver and kidney disease. Source: 2017 CDC (see chart below)

Based on the 2018 County Health Rankings study performed by the Robert Wood Johnson Foundation and the University of Wisconsin, Carroll County ranked 6th healthiest County in New Hampshire out of the 10 counties ranked (1 = the healthiest; 10 = unhealthiest), 8th for health outcomes and 4th for health factors.

County Health Rankings suggest the areas to explore for improvement in Carroll County were: higher adult smoking, higher adult obesity percentage, higher percentage of uninsured, lower percentage of adults with some college, higher percentage of children in poverty, higher rate of injury deaths. The areas of strength were identified as higher food environment index, lower physical inactivity, lower excessive drinking, lower sexual transmitted infections rate, lower teen birth rate, lower population to primary care physicians, lower preventable hospital stays, higher mammography screening, higher flu vaccinations, higher high school graduation percentage, lower unemployment and lower air pollution.

When analyzing the health status data, local results were compared to New Hampshire, the U.S. (where available), and the top 10% of counties in the U.S. (the 90th percentile). Where Carroll County’s results were worse than NH and U.S., groups and individuals have an opportunity to act and improve these community measures. To become the healthiest community in New Hampshire and eventually the Nation, Carroll County must close several lifestyle gaps. For additional perspective, New Hampshire was ranked the 6th healthiest state out of the 50 states. (Source: 2018 Americas Health Rankings) New Hampshire strengths were low infant mortality rate, low levels of air pollution and low prevalence of diabetes. New Hampshire challenges were high drug death rate, high prevalence of excessive drinking, and low per capita health funding.

Comparisons of Health Status

Information from County Health Rankings and America’s Health Rankings was analyzed in the CHNA in addition to the previously reviewed information and other public health data. Other data analyzed is referenced in the bullets below, such as: causes of death, demographics, socioeconomics, consumer health spending, focus groups, and surveys. If a measure was better than New Hampshire, it was identified as a strength, and where an indicator was worse than New Hampshire, it was indicated an opportunity for improvement. To prevent strengths from becoming opportunities for improvement, it’s important to continually focus on them. It is important to also pay attention to trends in the data. Opportunities were denoted with red symbols, and strengths were denoted with green stars for easy interpretation. The years displayed on the County Health Rankings graphs show the year the data was released. The actual years of the data are contained in the source notes below the graphs.

In most of the following graphs, Carroll County will be blue, New Hampshire (NH) will be red, U.S. green and the 90th percentile of counties in the U.S. gold. * indicates a change in the BRFSS Survey calculations of results. 2016 forward cannot be compared to prior year results.
Health Outcomes (Length of Life and Quality of Life)

Health Outcomes are a combination of length of life and quality of life measures. Carroll County ranked 8th in Health Outcomes out of 10 New Hampshire counties.

Length of life was measured by years of potential life lost per 100,000 population prior to age 75, lower is better. For example, if a 25-year-old is killed in an accident, that is 50 years of potential life lost prior to age 75. Carroll County ranked 9th in length of life in NH. Carroll County lost 7,521 years of potential life per 100,000 population which is higher than NH and the U.S.

Source: County Health Rankings; National Center for Health Statistics – Mortality File 2015-2017
Quality of Life

Quality of life was measured by: % reporting fair or poor health, the average number of poor physical health days and poor mental health days in the past 30 days, and % of live births with birthweight less than 2500 grams, or 5.5 lbs. Carroll County ranked 7th in New Hampshire for quality of life.

Quality of Life STRENGTHS

- Carroll County had a lower death rate for heart disease, respiratory diseases, diabetes, influenza and pneumonia and kidney disease than NH.
- Carroll County had a lower percentage of adults reporting fair or poor health than NH and the U.S. at 13%
- Carroll County had a lower percentage of low birthweight babies at 6% than NH and the U.S., equal to the 90th percentile of counties in the U.S.

Quality of Life OPPORTUNITIES

- Carroll County had higher years of potential life lost prior to age 75 per 100,000 population at 7,521 than NH and the U.S.
- Carroll County had a higher death rate for cancer, accidents (unintentional injuries), stroke, Alzheimer’s disease, suicide and liver disease than NH.
- Carroll County had a higher average of poor physical health days than NH and the U.S.
- Carroll County also had the same average number of poor mental health day as NH, which is higher than the U.S.
Health Factors or Determinants

Health factors or determinants rankings are comprised of measures related to health behaviors (30%), clinical care (20%), social & economic factors (40%), and physical environment (10%). Carroll County ranked 4th out of 10 New Hampshire counties for health factors.

Health Behaviors

Health behaviors are made up of nine measures and account for 30% of the county rankings. Carroll County ranked 1st out of 10 counties in New Hampshire.

Source: Obesity, physical inactivity - County Health Rankings; CDC Diabetes Interactive Atlas based on responses to BRFSS and Census Bureau's population estimates program, 2015
Source: Access to exercise opportunities - County Health Rankings; ArcGIS Business Analyst, Delorme map data, Esri and U.S. Census Tigerline Files, 2010 and 2018. Measures the percentage of individuals in a County who live reasonably close to a location for physical activity, defined as parks or recreational facilities (local, state national parks, gyms, community centers, YMCAs, dance studios and pools based on SIC codes)
Source: Smoking - County Health Rankings; Behavioral Risk Factor Surveillance System (BRFSS), 2016
The food environment index is comprised of % of the population with limited access to healthy foods and % of the population with food insecurity. Limited access to foods estimates the % of the population who are low income and do not live close to a grocery store. Food insecurity is the % of the population who did not have access to a reliable source of food during the past year.
Health Behaviors cont’d

Health Behaviors STRENGTHS

• Adult obesity in Carroll County was lower than NH and the U.S. at 26%. However, the obesity trend has been increasing in Carroll County. Obesity in New Hampshire and the U.S. continue to rise, putting people at increased risk of chronic diseases including: diabetes, kidney disease, joint problems, hypertension, heart disease and more.
• Physical inactivity was the same in Carroll County at 20% as in NH at 20% and lower than the U.S. at 22%.
• Carroll County was in the 90th percentile of all counties in the U.S. for adult smoking with 14%. However, smoking is known to cause cancer and other health complications.
• 17% of Carroll County reported binge or heavy drinking, lower than NH at 20% and the U.S. at 18%.
• Alcohol impaired driving deaths were lower in Carroll County at 29% than in NH at 31% and same as the U.S.
• Sexually transmitted infections measured by chlamydia rate per 100,000 population were lower in Carroll County at 176 than NH at 261, and the U.S. at 497.
• The number of drug poisoning deaths per 100,000 population was 16 in Carroll County, higher than New Hampshire at 10 but lower than the U.S. at 19.

Health Behaviors OPPORTUNITIES

• Access to exercise opportunities in Carroll County was 81%, lower than NH at 87% and the U.S. at 84%.
• The teen birth rate in Carroll County was 16 births per 1,000 female population ages 15-19 and was higher than NH at 11 births, but lower than the U.S. at 25 births. The trend has decreased since 2016.
• The food environment index was lower in Carroll County at 9.1 than NH at 9.2, but higher than the U.S.

Carroll County ranks 1st out of the 10 counties in New Hampshire for Health Behaviors!
Clinical Care

The Clinical Care ranking is made up of seven indicators, and account for 20% of the county rankings. Carroll County ranked 8th out of 10 New Hampshire counties in clinical care.

Clinical Care cont'd

Clinical Care STRENGTHS

• Preventable hospital stays in Carroll County were 3,621 per 100,000 Medicare enrollees which was lower than NH at 3,947 and the U.S. at 4,648.
• The cancer incidence rate in Carroll County was 450.0 cases per 100,000 population which was lower than NH at 479.7. It is important to note that cancer deaths are still a priority focus for Carroll County as the county has a higher rate of cancer deaths than NH and the U.S. While the incidences are lower, the death rates are higher.
• The percent of Medicare enrollees with flu vaccines per year was higher in Carroll County at 48% than NH at 43% and the U.S. at 42%.

Clinical Care OPPORTUNITIES

• Mammography screening was lower in Carroll County at 47% than NH at 49% but higher than the U.S. at 40%.
• The percent of population under sixty-five without health insurance was 9% in Carroll County which was higher than NH at 7% but lower than the U.S. at 10%.
• The population per primary care physician was higher in Carroll County than NH but lower than the U.S.
• The population per dentists was higher in Carroll County than NH but lower than the U.S.
• The population per mental health providers was higher in Carroll County than NH and the same as the U.S.
• The percentage of adults with diabetes in Carroll County at 10% was higher than NH at 9% and the same as the U.S.

Social & Economic Factors

Social and economic factors account for 40% of the county rankings. There are eight measures in the category. Carroll County ranked 7th out of 10 New Hampshire counties for social and economical factors.

- **High school graduation** (% of 9th grade cohort graduating in 4 yr) Higher is better
  - 2016: Carroll 94%, New Hampshire 90%, US Avg 85%, 90th Percentile
  - 2017: Carroll 94%, New Hampshire 90%, US Avg 85%, 90th Percentile
  - 2018: Carroll 94%, New Hampshire 90%, US Avg 85%, 90th Percentile
  - 2019: Carroll 94%, New Hampshire 90%, US Avg 85%, 90th Percentile

- **Some college** (% of adults 35-44 with some postsecondary ed) Higher is better
  - 2016: Carroll 62%, New Hampshire 59%, US Avg 55%, 90th Percentile

- **Children in poverty** (% under age 18 in poverty)
  - 2016: Carroll 15%, New Hampshire 17%, US Avg 19%, 90th Percentile
  - 2017: Carroll 15%, New Hampshire 17%, US Avg 19%, 90th Percentile
  - 2018: Carroll 15%, New Hampshire 17%, US Avg 19%, 90th Percentile
  - 2019: Carroll 15%, New Hampshire 17%, US Avg 19%, 90th Percentile

- **Children in single-parent households** (% of HH headed by a single parent)
  - 2015: Carroll 31%, New Hampshire 33%, US Avg 35%, 90th Percentile
  - 2016: Carroll 31%, New Hampshire 33%, US Avg 35%, 90th Percentile
  - 2017: Carroll 31%, New Hampshire 33%, US Avg 35%, 90th Percentile
  - 2018: Carroll 31%, New Hampshire 33%, US Avg 35%, 90th Percentile
  - 2019: Carroll 31%, New Hampshire 33%, US Avg 35%, 90th Percentile

- **Social associations** (# of membership assoc. per 10,000 pop)
  - 2016: Carroll 12, New Hampshire 14, US Avg 15, 90th Percentile

- **Income inequality** (ratio of HH income at the 80th percentile to income at the 20th percentile)
  - 2016: Carroll 4, New Hampshire 5, US Avg 6, 90th Percentile
  - 2018: Carroll 4, New Hampshire 5, US Avg 6, 90th Percentile
  - 2019: Carroll 4, New Hampshire 5, US Avg 6, 90th Percentile

- **Injury deaths** (injury mortality per 100,000)
  - 2016: Carroll 105, New Hampshire 120, US Avg 125, 90th Percentile
  - 2017: Carroll 105, New Hampshire 120, US Avg 125, 90th Percentile
  - 2018: Carroll 105, New Hampshire 120, US Avg 125, 90th Percentile
  - 2019: Carroll 105, New Hampshire 120, US Avg 125, 90th Percentile

- **Violent crime rate** (violent crime per 100,000 pop)
  - 2016: Carroll 181, New Hampshire 250, US Avg 300, 90th Percentile

Sources:
Social & Economic Factors cont’d

Social & Economic Factors STRENGTHS

• The high school graduation rate was higher in Carroll County at 94% than NH at 89% and the U.S. at 85%.
• Social associations were higher in Carroll County at 12 memberships per 10,000 population than NH at 10 and the U.S. at 9 memberships. Associations include membership organizations such as civic organizations, bowling centers, golf clubs, fitness centers, sports organizations, religious organizations, political organizations, labor organizations, business organizations, and professional organizations.
• Income inequality represents the ratio of household income at the 80th percentile compared to income at the 20th percentile. Income inequality was the same in Carroll County at 4.0 as in NH and lower than the U.S. at 5.
• The violent crime rate in Carroll County was 181 violent crimes per 100,000 population, which was lower than in NH at 197 and the U.S. at 386.

Social & Economic Factors OPPORTUNITIES

• 52% of Carroll County adults had some postsecondary education which was lower than NH at 70% and lower than the U.S. at 65%.
• The children in poverty rate was higher for Carroll County at 15% than NH at 10%, but lower than the U.S. at 18%. Carroll County has experienced a decreased rate of children in poverty since 2016.
• The percentage of children in single-parent households was 31% in Carroll County which was higher than NH at 28% but lower than the U.S. at 33%.
• Injury deaths were higher in Carroll County at 105 per 100,000 population than NH at 80 and the U.S. at 67, and the trend has continued to increase. Unintended injury deaths were comprised of poisoning, motor vehicle traffic deaths and falls. Carroll County had higher death rates in all three of these than NH. Unintentional injuries are comprised of firearm suicides, suffocation suicides, and firearm homicides.
• The poverty estimates for 2017 had poverty in Carroll County at 9.3% which is higher than NH at 7.7% but lower than the U.S. at 13.4%.
• The median household income in Carroll County was lower than NH and the U.S. at $57,598.
Physical Environment

Physical environment contains four measures in the category and accounts for 10% of the county rankings. Carroll County ranked 3rd out of 10 New Hampshire counties in physical environment.

Community Input: Focus Group, Interviews, Surveys

Focus Groups and Interview Results

Thirty community stakeholders participated in two focus groups on July 24, 2019 for their input into the community's health. These stakeholders represent the broad interests of the community as well as low income, medically underserved and minority populations. Below is a summary of the 90-minute focus group discussions.

1. How do you define health?
   - State of wellness that lets us have quality of life
   - Being able to do the things we want to do
   - Overall wellbeing that includes social, physical and mental health
   - Hope and the ability to plan for the future

2. Generally, how would you describe the community's health?
   - Limited
   - Variable
   - Surprisingly tenuous
   - Disparate (some have really good health, and some are really struggling)
   - Unequally distributed based on economics and education

3. What are the most important health issues facing Carroll County?
   - Mental health
   - Substance misuse
   - Lack of access to care and transportation
   - Lifestyle – health literacy
   - Nutrition
   - Senior issues – chronic conditions and trying to stay in their homes

4. What are the most important health issues facing medically-underserved, low-income and minority populations?
   - Same as in question 3, but every issue is exacerbated
   - Literacy issues
   - Lack of insurance, can't get treatment
   - Cost of healthcare – high deductible plans
   - Lack of affordable housing
   - Toxic stress – jobs, transportation, financial strain

5. What are the most important health issues facing children/adolescents?
   - Homelessness
   - Mental health – anxiety, behavioral issues, anger
   - Adverse Childhood Experiences (ACEs), trauma
   - Neglect, abuse, family dysfunction
   - Poor nutrition
   - Lack of exercise
   - Screens, computers, social media creating stress and lack of exercise
   - Drug use and vaping
   - Lack of structured activities

6. What are the most important health issues facing seniors?
   - Falls and accidental injuries
   - Living alone with no support or caregivers
   - Cost of medications and medical care
   - Isolation
   - Chronic conditions
   - Taking care of grand kids
   - Lack of care coordination
Focus Group Results cont’d

7. The community performed a CHNA in 2016 and identified the following priorities for health improvement:
   • Substance use
   • Mental Health
   • Chronic disease/prevention
   • Access
   • Senior/aging issues

What has changed most related to health status in the last three years based on those priorities?

<table>
<thead>
<tr>
<th>Better</th>
<th>Worse</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Younger population more open to mental health discussions and accessing care</td>
<td>• Mental health – lack of treatment</td>
</tr>
<tr>
<td>• Handling mental health patients better</td>
<td>• Lack of mental health facilities</td>
</tr>
<tr>
<td>• Focusing more on chronic disease management in the last three years as well as prevention</td>
<td>• Toxic stress is worse</td>
</tr>
<tr>
<td>• Taking steps on Medically Assisted Treatment for addiction locally</td>
<td>• Substance use is still a priority</td>
</tr>
<tr>
<td>• More resources to address mental health and substance use/addiction</td>
<td>• Access – no transportation</td>
</tr>
<tr>
<td></td>
<td>• Social determinants need more attention</td>
</tr>
</tbody>
</table>

8. What behaviors have the most negative impact on health?
   • Smoking, tobacco use
   • Drinking, drug misuse
   • Willingness to engage in health culture and lifestyle
   • Lack of willingness to seek help
   • Injury deaths – seat belts, helmets, motor vehicle collisions, falls
   • Eating healthy foods or not, overeating
   • Stress, lack of coping skills
   • Screen addiction

9. What environmental factors have the most negative impact on health?
   • Ticks
   • Lack of transportation
   • Winter – homeless and power outages, ice and snow
   • Low pedestrian access

10. What do you think the barriers will be to improve health in the communities?
    • Transportation
    • Insurance coverage
    • Financial barriers – cost of medication, care and insurance
    • Medication management
    • Lack of health education
    • Lack of formal education – not financially accessible to large part of the population
    • Communication of services available
    • Elderly living conditions
Focus Group Results cont’d

11. What community assets support health and wellbeing in our local communities?
   • Food Banks
   • Food pantries
   • Meals on Wheels
   • Elderly transportation volunteers
   • Children's Center
   • School systems
   • Healthy Families Program
   • Laconia Area Center
   • Southern NH VNA
   • ServiceLink
   • Child Advocacy Center
   • Lakes, walking trails, ski areas
   • Parks, Recreation Center
   • Organized sports
   • Food Cooperatives
   • Global Awareness Local Action
   • Tamworth Dental Center
   • School nurses
   • LGBTQ support group
   • White Horse Addiction Center
   • Huggins Hospital – adding providers, expanding services
   • Huggins Community Health Network
   • Huggins Hospital’s Adult Day Program
   • Northern Human Services – mental health
   • Senior Companionship Program
   • 211 – one stop call for referrals
   • End 68 Hours of Hunger
   • CMT – linking physical and mental health EMR info
   • Collaboration, people who care
   • Churches
   • Endeavor Center
   • After school programs
   • Kingswood Youth Center
   • Hope House for transitional living
   • Libraries
   • Welfare offices
   • Jail reentry program, life skills
   • Great recovery community (AA, NA and more)

12. What improvement activities should be a priority for the county to improve health?
   • Centralized, affordable, reliable transportation
   • Single payer insurance
   • More case management
   • More medical specialists
   • More pain management
   • Affordable housing
   • Childcare
   • More caregivers
   • More activities for seniors
   • Youth retention
   • Programming that focuses on adverse childhood experiences
   • Education – health, resources available, cause and effect
   • Lower cost of healthcare and insurance
   • Telemedicine programs
Community Survey

Survey Results

Survey Process

Huggins Hospital conducted a phone survey of 300 community members – 172 landlines, 21 cell phones and 107 web-based surveys. The survey focused on ZIP codes in southern Carroll County where Huggins Hospital proposes to focus implementation planning. The surveys were conducted from June 19 through July 15, 2019 by Wilkins Research Services and analyzed by Stratasan. Responses were compared to the previous 2016 phone survey. The 2016 survey covered all of Carroll County and was landline only.

Huggins Hospital Survey Area

Survey Demographics

Zip Code

The 2019 survey captured more surveys in the ZIP codes outside of Wolfeboro.
Community Survey cont’d

Survey Demographics
Gender, Age, Race or ethnic background

Gender
- Male: 40% (2016), 39% (2019)
- Female: 60% (2016), 61% (2019)

Race or ethnic background
- Caucasian/White: 95% (2016), 94% (2019)
- Mixed Race: 5% (2016), 3% (2019)
- Decline to answer: 3% (2016), 3% (2019)
- Asian or Pacific Islander: 1% (2016), 0% (2019)
- Hispanic or Latino: 0% (2016), 0% (2019)
- Other: 0% (2016), 0% (2019)

Age
- 18 to 24: 0% (2015), 2% (2019)
- 25 to 34: 1% (2015), 5% (2019)
- 35 to 44: 4% (2015), 10% (2019)
- 45 to 54: 13% (2015), 13% (2019)
- 55 to 64: 19% (2015), 22% (2019)
- 65 to 74: 35% (2015), 28% (2019)
- 75 or older: 24% (2015), 23% (2019)

Health Status
Generally, how would you describe your health?
- Poor: 6% (2016), 6% (2019)
- Fair: 17% (2016), 19% (2019)
- Good: 48% (2016), 55% (2019)
- Excellent: 28% (2016), 19% (2019)
- Decline to answer: 1% (2016), 0% (2019)

The survey skewed female. The race and ethnicity matches that of the community. The 2019 survey skewed older but captured more young population with 51% being 65 or over and 49% being younger than 65.
**Basic Healthcare Needs**

If you have one person or group you turn to for basic healthcare needs, where do you go most often?

<table>
<thead>
<tr>
<th>Option</th>

Community Assets and Resources

Community Asset Inventory

During the Community Focus Groups, members of the community and public health, mental health and physical health organizations listed a few resources that are available, currently, as community assets. For a more complete listing of resources in our communities, please access 2-1-1.

211 NH is the connection for New Hampshire residents to the most up to date resources they need from specially trained Information and Referral Specialists. 211 NH is available 24 hours, 365 days a year. Simply call 2-1-1 or find them online at www.211NH.org. Multilingual assistance and TDD access is also available. For those outside of New Hampshire, call 1.866.444.4211.

Next Steps

2019 Implementation Plan

In the upcoming months, Huggins Hospital will be working in collaboration with Huggins Community Health Network Board members to define an Implementation Plan based on the 2019 Community Health Needs Assessment. The Implementation Plan will be approved by the Huggins Hospital Board of Trustees and added to this report to be posted online at www.hugginshospital.org and available in print through the hospital’s Community Relations Department.
2016 Huggins Hospital Implementation Plan/Impact Evaluation

Huggins Hospital adopted an implementation plan in 2016. The results of this plan were reviewed during the Community Focus Groups in 2019.

The top health issues in 2016 were:

- Substance misuse
- Mental Health
- Chronic diseases/prevention
- Access
- Senior/Aging Issues
- Obesity

The Implementation Plan from 2016 included strategies such as the following:

- Increase specialty and primary care services and access
- Develop Coordinated Care program in Primary Care offices
- Expand Community Education
- Expand programming through Rehabilitation team and services
- Support healthy activity initiatives in community
- Create Senior Wellness Group through Huggins Hospital to offer specific health information and social interaction for those 55+
- Identify seniors in need
- Provide activities for seniors in community (ie: line dancing, etc.)
- Develop program to educate seniors about how to age at home safely and about Advanced Care Planning
- Begin Falls Program - Tai Ji Quan
- Participate in multiple groups of the Medicaid 1115 Waiver, a program to transform the NH behavioral health delivery system
- Advocate for patients through participation in community forums and groups addressing mental health and behavioral health as well as substance misuse
- Support other organizations that focus in substance misuse, mental health and behavioral health

With this Implementation Plan, Huggins Hospital:

- Embarked on a Strategic Planning process to redefine the organization’s vision, mission and initiatives based on the Community Health Needs Assessment findings and through collaboration with employees and community members
- Developed the Huggins Community Health Network to address gaps in services throughout the community
- Expanded specialty and primary care services in the area
- Expanded programs through the hospital’s Rehabilitation teams
- Supported organizations in the community that are dedicated to health and overall wellbeing
- Provided classes at the local Senior Center
- Developed education and communication about how to age at home safely
- Participated in the Medicaid 1115 Waiver and added social services and care coordination to the Huggins teams

A summary of comments regarding the 2016 Community Health Needs Assessment and implementation Plan:

- Huggins Hospital has made a lot of progress in the field of Mental Health for their inpatients.
- Huggins Hospital is making progress toward coordinated efforts for substance use treatments and supports.
- Mental Health is still a major issue.
- There has been more focus on caring for the whole person - physical, mental, social - as opposed to just clinical care.
