Perspective/Overview

Creating a culture of health in the community

The Huggins Hospital Community Health Needs Assessment defines priorities for health improvement, creates a collaborative community environment to engage stakeholders, and an open and transparent process to listen and truly understand the health needs of Carroll County, New Hampshire. Huggins Hospital (Huggins) conducted a Community Health Needs Assessment (CHNA) in 2013. This 2016 assessment analyzes progress since the last assessment as well as defines new or continued priorities for the next three years.

Huggins Hospital engaged national leaders in CHNA, Stratasan, to assist in the project. Stratasan, a healthcare analytics and facilitation company out of Nashville, Tennessee provided the analysis of community health data and a community telephone survey. Stratasan also presented the data and analysis to the community during Huggins Hospital’s Community Health Summit. The event provided an opportunity for community members and local health and safety agencies to determine significant health needs and goals for improvement.

- Huggins Hospital’s Board of Trustees will approve and adopt this CHNA and an implementation strategy in 2016.
- Starting on September 1, 2016, this report was made widely available to the community via Huggins Hospital’s website, www.hugginshospital.org, and paper copies are available free of charge at Huggins Hospital.

Participants
Over sixty individuals from over forty community and health care organizations collaborated to conduct a comprehensive CHNA process focused on identifying and defining significant health needs, issues, and concerns of Carroll County. The process centered on gathering and analyzing data as well as receiving input from persons who represented the broad interests of the community and who had special knowledge and expertise in public health. The participants helped provide direction for the Hospital to create a plan to improve the health of the community.

Project Goals
1. To implement a formal and comprehensive community health assessment process for the identification and prioritization of significant health needs of the community to allow for resource allocation, informed decision-making and collective action that will improve health.
2. To initiate a collaborative partnership between all stakeholders in the community by seeking input from persons who represent the broad interests of the community.
3. To support the existing infrastructure and utilize resources to instigate health improvement in the community.
“We initiated the Community Health Needs Assessment with the goals to analyze changes in significant health needs and priorities from 2013’s Community Health Needs Assessment and collaborate with the community to address those needs,” said Jeremy Roberge, President & Chief Executive Officer at Huggins Hospital. “It is our goal to use our findings as a catalyst for community mobilization to improve the health of our residents and visitors.”

“We utilized the information we gathered from public health data and community stakeholders to set priorities for significant health issues Huggins Hospital could address through our Implementation Plan. We hope other community organizations will join us,” added Monika O’Clair, Senior Director of Communication & Community Relations at Huggins Hospital. “The Community Health Summit was the final step in the assessment process. Now the real work—improving the health of the community and implementing the ideas presented—begins.”
Community

Input and Collaboration

Data Collection and Timeline

In February, 2016, Huggins Hospital contracted with Stratasan to assist in conducting a Community Health Needs Assessment for Carroll County, New Hampshire. Huggins Hospital sought input from persons who represent the broad interests of the community using several methods:

- Information gathering, using secondary public health sources, occurred in April and May of 2016.
- 300 community surveys were conducted from April 27 through May 13, 2016. The phone numbers used for dialing were purchased from Marketing Systems Group. The numbers were dialed at random. The completed surveys include 257 landline surveys and 43 cell phone surveys.
- A Community Health Summit was held on May 26, 2016 with 45 community stakeholders attending. The audience consisted of healthcare providers, the Carroll County Coalition for Public Health, businesses, law enforcement, EMS, government representatives, human services, not-for-profit organizations (hospitals, home health, mental health, substance abuse, elderly services) and other community members.
Participation in the Community Health Summit creating the Carroll County Community Health Needs Assessment and Improvement Plan:

In many cases, several representatives from each organization participated.
**Input of Public Health Officials**

At the Summit held on May 26, 2016, Emily Benson, Carroll County Coalition for Public Health Advisory Council Coordinator, presented information and priorities from the Public Health perspective.

The Carroll County Coalition for Public Health is focusing on the following priorities areas in the 2016-

- Early Childhood and Parental Support
- Mentally Healthy Families (including addiction free families)
- Aging with Connection and Purpose, and
- Emergency Preparedness Across the Life Span

Where there are common initiatives between the state, counties, hospitals, and community groups, coordination of efforts would be ideal.

**Input of Medically Underserved, Low-Income, and Minority Populations**

Input of medically underserved, low-income and minority populations was received during the community survey and Community Health Summit. People representing these population groups were intentionally invited to participate in the process.

**Community Engagement and Transparency**

We are pleased to share the results of the Community Health Needs Assessment with our community in hopes of attracting more advocates and volunteers to improve the health of the community. The following pages highlight key findings of the assessment. We hope you will take the time to review the health needs of our community as the findings impact each and every citizen in one way or another. We also hope you will join in the improvement efforts. The comprehensive data analysis may be obtained via a PowerPoint on our website at www.hugginshospital.org or by contacting Huggins Hospital.

The Carroll County Coalition for Public Health produced Carroll County 2020: Community Health Improvement Plan 2016-2019. You can access this report online at www.C3PH.org. Huggins Hospital was involved in this assessment and plan.

Additionally, Memorial Hospital in North Conway, NH, also located in Carroll County, produced a Community Health Needs Assessment in 2016.

All three of these assessments had community involvement and contain excellent community health information and improvement plans.
Community

Selected for Assessment

Huggins Hospital’s patient information provided the basis for the geographic focus of the CHNA. The map below shows where Huggins Hospital’s patients live; most inpatients came from Carroll County (75%). Therefore, it was reasonable to select Carroll County as the primary focus of the CHNA. However, surrounding counties should benefit from efforts to improve health in Carroll County.

The community included medically underserved, low-income or minority populations who live in the geographic areas from which Huggins Hospital draws its patients. All patients were used to determine the service area without regard to insurance coverage or eligibility for financial assistance under Huggins Hospital’s Financial Assistance Policy.

Huggins Hospital Patients - 2015

Source: Huggins Hospital, 2015
Key Findings

Community Health Assessment

Information Gaps
While this assessment was quite comprehensive, it cannot measure all possible aspects of health in the community, nor can it adequately represent all possible populations of interest. It must be recognized that these information gaps might in some ways limit the ability to assess all of the community’s health needs.

For example, certain population groups (such as the homeless, institutionalized persons, or those who only speak a language other than English) were not represented in the primary data.

Other population groups (for example, pregnant women, lesbian/gay/bisexual/transgender residents, undocumented residents, and members of certain racial/ethnic or immigrant groups) might not be identifiable or might not be represented in numbers sufficient for independent analyses.

Process and Methods
Both primary and secondary data sources were used in the CHNA. Primary methods included:
• Community telephone surveys
• Community Health Summit

Secondary methods included:
• Public health data – death statistics, county health rankings
• Demographics – population, poverty, uninsured
• Psychographics

Carroll County has a large seasonal population with seasonal, part-time homes and vacation populations. Census data includes primary residence information.
Demographics of the Community

Racial and Ethnic Make-up

- White
- Black
- American Indian
- Asian/Pacific Islander
- Mixed Race
- Other
- Hispanic Origin

- Source: ESRI
Carroll County, New Hampshire

- The population of Carroll County was projected to increase from 2015 to 2020 (.15% per year), lower than the rate of NH at .47%, the U.S. at .75%.
- Carroll County was older (50.5 median age) than NH and the U.S. and had lower median household income ($52,472) than both NH and the U.S.
- The medical care index measures how much the county spent out of pocket on medical care services. The U.S. index was 100. Carroll County (112 index) spent 12% more than the average U.S. household out-of-pocket on medical care (doctor’s office visits, prescriptions, hospital services).
- The racial make-up of Carroll County was 97% white, 1% black, 1% Asian/Pacific Islander, 1% some other race, and 2% Hispanic origin (the total exceeds 100% due to Hispanic being an ethnicity rather than a race).
- The median household income distribution of Carroll County was 21% higher income (over $100,000), 51% middle income and 28% lower income (under $24,999).

Census tracts generally have a population size between 1,200 and 8,000 people, with an optimum size of 4,000 people. There were higher population census tracts, 5,000-7,999 in the large census tract in the upper northeast section of the county and in the two southernmost tracts, Wolfeboro and Wakefield. The remainder of the county is more rural with tracts containing 2,000 to 4,999 population.

The population was projected to grow in the two census tracts in the east of the county near Eaton, .48 to .94% up to twice the NH growth rate. There are five tracts growing .01% to the growth rate of NH, .47%. These tracts are Wolfeboro, Chatham, Effingham and Moultonborough. The remainder of the county was projected to decline in population.
These maps depict median age and median income by census tract. There was a tract with older population (55+ median age) in Wolfeboro. The remainder of the county’s tracts had median ages between 45 and 54. There were four tracts with median household income ($35,000 – 49,999) in Chatham, Ferncroft, Sandwich, and Freedom/Effingham. [1] Not all households were at the median in a census tract, but these are indicators of segments of the population that may need focused attention. There is one higher median income ($70,000 - $99,999) tract around Moultonborough. The remainder of the county has a median income of $50,000 to $69,999, which includes Wolfeboro and Jackson.

The rate of poverty in Carroll County was 10.1% (2009-2013 data), which was above NH (8.7%) but below the US (15.4%). The poverty percentage was in the middle of the surrounding counties with the highest being Coos at 13.4% and the lowest being Rockingham at 5.5%.

Carroll County’s unemployment was 3.6% compared to 2.9% for New Hampshire and 5.0% for the U.S. Unemployment decreased significantly in the last few years.

1 The median is the value at the midpoint of a frequency. There is an equal probability of falling above or below the median.
Health Status Data

The major causes of death in Carroll County were cancer then heart disease, followed by accidents, chronic lower respiratory disease, stroke, Alzheimer’s disease, suicide, diabetes, kidney, and liver disease. Source: 2014 CDC

Based on the latest County Health Rankings study performed by the Robert Wood Johnson Foundation and the University of Wisconsin [1], Carroll County ranked 4th healthiest county in New Hampshire out of the 10 counties ranked (1= the healthiest; 10 = unhealthiest). County Health Rankings suggest the areas to explore for improvement in Carroll County were adult smoking, adult obesity, uninsured and injury deaths. The areas of strength were identified as lower physical inactivity, lower excessive drinking, lower sexually transmitted infections and teen births, lower population to primary care physician ratio, low preventable hospital stays, higher mammography screenings, higher graduation and some college percentages, lower unemployment, lower children in poverty and lower income inequality.

When analyzing the health status data, local results were compared to New Hampshire, the U.S. (where available) and the top 10% of counties in the U.S. (the 90th percentile). Where Carroll County’s results were worse than the State and U.S., there is an opportunity for group and individual actions that will result in improved community ratings. There are several lifestyle gaps that need to be closed in order to improve health in Carroll County. For additional perspective, New Hampshire was ranked

---

1 The Rankings are based on a model of population health that emphasizes the many factors that, if improved, can help make communities healthier places to live, learn, work and play. Building on the work of America’s Health Rankings, the University of Wisconsin Population Health Institute has used this model to rank the health of Wisconsin’s counties every year since 2003.
Survey Results, Health Status Comparisons

Survey Results

Three hundred random households were surveyed via telephone and cell phone to obtain input into the health needs of the county. Since the survey was random, it represented the broad interests of the community. Low income, uninsured and minorities were represented. The survey skewed slightly female and older since no quotas were set.

Health Status

When asked to describe their health, the responses were:

- 78% responded excellent and good
- 21% responded fair or poor

Turn for Healthcare Needs

When asked where they turn for your basic healthcare needs, the responses were:

- My primary care doctor or family physician: 65%
- Hospital: 28%
- Free or low income clinic: 3%
- Use Specialist as PCP: 3%
- Health department: 2%
- Alternative healthcare providers: 1%
- Friend or Relative: 1%
- Other: 1%

Most turn to primary care physicians for care followed by a hospital.
Access

Doctors

Was there a time you couldn’t see a doctor?

93%

7%

Yes  No

What are some reasons why you could not see a doctor?

- Doctor unavailable: 52%
- Lack of transportation: 10%
- Inconvenient office hours: 10%
- Lack of money/insurance for office visit: 10%
- I do not have a healthcare provider: 10%
- Specific service I needed was not available locally: 5%
- Other: 5%
  - Poor Communication

Only 7% indicated there was a time when they could not access a doctor. The primary reason was doctor was unavailable.

Dentists

Was there a time you couldn’t see a dentist?

91%

9%

Yes  No

What are some reasons why you could not?

- Lack of money/insurance for office visit: 70%
- Lack of transportation: 7%
- Specific service I needed was not available: 7%
- Dentist unavailable: 7%
- Busy: 7%
- I’m not comfortable with any dentist: 4%
- Don’t know how to find a good dentist: 4%
- Inconvenient office hours: 4%

9% (27 responses) indicated there was a time they could not access a dentist.
Mental Health Professionals

Was there a time you couldn’t see a mental health professional?

- Yes: 98%
- No: 1%
- Don’t know: 1%

What are some reasons why you could not?

- Specific service I needed was not available locally: 50% (only 1 response)
- I do not have a healthcare provider: 50% (only 1 response)

Only 1%, 2 responses, indicated there was a time they could not see a mental health professional.

Physical Activity and Smoking

How often did you participate in any physical activities or exercise such as fitness walking, running, weight-lifting, team sports, etc.?

- Never: 15%
- Every once in a while: 15%
- 1-2 times a week: 14%
- 3-4 times a week: 23%
- 5-7 times a week: 26%
- Several times a day: 8%

How often do you smoke, if you do?

- Never - do not smoke: 91%
- A few times a month: 1%
- Weekly: 2%
- Daily: 4%
- Hourly: 2%

30% of the population does not exercise regularly, and 70% exercises regularly. Only 9% said they smoke.
Access to Healthy Foods

99% have access to healthy foods. 40% travel five miles or more to the grocery store with fresh fruits and vegetables.

Substance Abuse

30% have themselves, or have a close friend or relative that has experienced substance abuse or addiction. 15% responded there was not treatment available. The most common substance involved was alcohol followed by prescription drugs, then heroin.
Top three issues that impact health?

Respondents said the top issues that impact people’s health are:

• Substance abuse (24%)
• People taking more responsibility for their own lifestyle/health (17%)
• Affordable healthcare (11%)
• Affordable health insurance (10%)

Top health concerns for children

The top health concerns for children were:

• Healthy diet (33%)
• Substance abuse (15%)
• Physical activity (15%)
• Responsible, involved parents (10%)

Disease prevalence

When asked, have you ever been told by a doctor you have any of these conditions, diseases or challenges, 80% responded affirmatively. The most prevalent issues were:

• High blood pressure/hypertension (46%)
• High cholesterol (34%)
• Arthritis (32%)
• Overweight or obese (24%)
• Cancer (19%)
• Diabetes (17%)
• Heart disease (12%)
• Asthma (11%)

Respondents were also asked if they had everything they needed to manage their health conditions. 93% responded yes and 7% responded no. Of those that responded no, they stated they needed more access to physicians/doctors, financial assistance, affordable healthcare/health insurance and more information/education about their conditions.

Top Health Needs in the Community

The top health needs in the community, identified through the phone survey, were:

• Substance abuse assistance (42%)
• Access to health insurance (33%)
• Access to care (27%)
• Obesity assistance (20%)
• More healthy eating, active living options (18%)
• Mental health assistance (16%)
• Help people to quit smoking (16%)
• More exercise opportunities (13%)

The survey skewed female and older, however the population is older. The other demographics of the survey mirrored the population, 95% white, educated, less educated, higher, middle and lower income.
Health Status Analysis and Comparisons

Information from County Health Rankings and America’s Health Rankings was analyzed in Huggins Hospitals Community Health Needs Assessment in addition to the previously reviewed information and other public health data. This additional analyzed data is referenced in the bullets below, such as: causes of death, demographics, socioeconomics, consumer health spending and community surveys. When data was available for New Hampshire, the U.S. or the top 10% of counties (90th percentile), they were used as comparisons. Where the data indicated a strength or an opportunity for improvement, it is called out below. Strengths are important because the community can build on those strengths, and it’s important to continue to focus on strengths so they don’t become opportunities for improvement. The full data analysis can be seen in the complete CHNA PowerPoint at www.hugginshospital.org. Opportunities were denoted with red stars and strengths were denoted using green stars. The years displayed on the County Health Rankings graphs show the year the data was released. The actual years of the data can be found in the source notes below the graphs.

Source(s): CDC: 1999-2014 Final Data. In order to get enough data to display county rankings, multiple years must be used.

Red areas had death rates higher than NH. The leading causes of death in Carroll County and New Hampshire were cancer followed by heart disease. In the U.S., heart disease leads cancer. After heart disease and cancer, lagging behind are the other causes of death in Carroll County: accidents, chronic lower respiratory disease, stroke, Alzheimer’s disease, suicide, diabetes, influenza and pneumonia, kidney disease and liver disease.
Health Outcomes (Length of Life and Quality of Life)

Health Outcomes are a combination of length of life and quality of life measures. Carroll County ranked 4th in Health Outcomes out of 10 New Hampshire counties. Length of life was measured by years of potential life lost per 100,000 population prior to age 75. Carroll County ranked 3rd in length of life.

In most of the following graphs, Carroll County will be blue, New Hampshire red, U.S. green and the 90th percentile gold.

Quality of Life

Quality of life was measured by: % reporting fair or poor health, the average number of poor physical health days and poor mental health days in the past 30 days, and % of live births with birthweight less than 2500 grams (5lbs 8ozs). Carroll County ranked 4th out of 10 counties for quality of life.
Quality of Life STRENGTHS

- Years of potential life lost (YPLL) per 100,000 population prior to age 75, was lower in Carroll County, 5,132 years lower, than New Hampshire and the U.S.

- The percent of low birthweight babies, less than 5.5 pounds, was lower in Carroll County than NH and the U.S.

In the other quality of life measures, Carroll County’s measures were between NH and the U.S.
Health Factors or Determinants

Health factors or determinants were comprised of measures related to health behaviors, clinical care, social and economic factors, and physical environment. Health behaviors are made up of nine measures. Health behaviors account for 30% of the county rankings. Carroll County ranked 1st out of 10 counties in New Hampshire for health factors.

Health Behaviors

Source: Obesity, physical inactivity - County Health Rankings; CDC Diabetes Interactive Atlas, 2012
Source: Access to exercise opportunities - County Health Rankings; ArcGIS Business Analyst, Delorme map data, ESRI and US Census Tigerline Files, 2013
Source: Smoking - County Health Rankings; Behavioral Risk Factor Surveillance System (BRFSS)
Source: Excessive drinking - County Health Rankings; Behavioral Risk Factor Surveillance System (BRFSS), 2014
Source: Alcohol-impaired driving deaths - County Health Rankings; Fatality Analysis Reporting System, 2010-2014
Source: STDs - County Health Rankings; National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention, 2013

The food environment index is comprised of % of the population with limited access to healthy foods and % of the population with food insecurity. Limited access to foods estimates the % of the population who are low income and do not live close to a grocery store. Food insecurity is the % of the population who did not have access to a reliable source of food during the past year.

Source: County Health Rankings; USDA Food Environment Atlas, 2012-2013
Health Behaviors STRENGTHS

- Adult obesity, lower than both New Hampshire and the U.S., was above 20%. Carroll County was at the top ten percent of counties in the U.S. This measure is a strength for Carroll County, however obesity puts people at increased risk of chronic diseases: diabetes, kidney disease, joint problems, hypertension and heart disease. Obesity can also cause complications in surgery and often leads to metabolic syndrome and type 2 diabetes. It is also a factor in cancers, such as ovarian, endometrial, postmenopausal breast cancer, colorectal, prostate and others.
- Physical inactivity was lower in Carroll County than NH and the U.S. in the top 10% of counties in the U.S.
- The percentage of driving deaths with alcohol involved was lower than NH and the U.S.
- Sexually transmitted diseases as measured by Chlamydia rate per 100,000 population was lower in Carroll County than New Hampshire and the U.S., and decreased since 2013’s release.
- The teen birth rate in Carroll County was lower than the U.S. and slightly higher than NH which is below the top 10%.
- Excessive drinking was lower than NH and the U.S.

Health Behaviors OPPORTUNITIES

- Adult smoking in Carroll County was lower than the U.S. and similar to NH. Each year approximately 443,000 premature deaths can be attributed to smoking. Cigarette smoking is identified as a cause of various cancers, cardiovascular disease, and respiratory conditions, as well as low birthweight and other adverse health outcomes.
- The percentage of the population with adequate access to locations for physical activity was lower in Carroll County than NH and the U.S.
- The food environment index was lower than NH and the U.S. The index is a blend of access to healthy food and food insecurity.
- Drug overdose deaths increased in Carroll County and NH in recent years to 16-20 per 100,000 of population in 2014.

Source: County Health Rankings; CDC WONDER mortality data, 2012-2014
Clinical Care

Clinical care ranking is made up of eight indicators and they account for 20% of the county rankings. Carroll ranked 8th out of 10 New Hampshire counties in clinical care.

Source: Uninsured - County Health Rankings; Small Area Health Insurance Estimates, 2013
Source: Preventable hospital stays, mammography screening, diabetic screening - County Health Rankings; Dartmouth Atlas of Health Care , 2013
Clinical Care STRENGTHS

- Preventable hospital stays in Carroll County, measured by hospitalization rate for ambulatory-sensitive conditions per 1,000 Medicare enrollees, was slightly lower than NH and lower than the U.S.
- The percent of diabetic Medicare enrollees receiving screening was higher in Carroll than NH and the U.S. and in the 90th percentile.
- Mammography screening was higher in Carroll than NH and the U.S.

Clinical Care OPPORTUNITIES

- The percent of population under sixty-five without health insurance was higher in Carroll County than NH and the U.S.
- Eleven percent of Carroll County had diabetes, which was higher than NH.
- The population per dentist was higher than NH and the U.S. The community survey indicated 9% could not find dental care.

Other indicators in the category were between NH and the U.S.
Social & Economic Factors

Social and economic factors account for 40% of the county rankings. There are eight measures in the social and economic factors category. Carroll County ranked 5th out of 10 New Hampshire counties in social and economic factors.

Source: High School graduation – County Health Rankings; States to the Federal Government via EDFacts, 2012-2013
Source: Some college - County Health Rankings; American Community Survey, 5-year estimates, 2010-2014
Source: Children in poverty - County Health Rankings; US Census, Small Area Income and Poverty Estimates, 2014
Source: Social associations - County Health Rankings; County Business Patterns, 2013
Social & Economic Factors STRENGTHS
• High school graduation was higher in Carroll County than NH and the U.S.
• Social associations were higher in Carroll County than NH and the U.S. Associations include membership organizations such as civic organizations, bowling centers, golf clubs, fitness centers, sports organizations, religious organizations, political organizations, labor organizations, business organizations, and professional organizations. Poor family support, minimal contact with others, and limited involvement in community life are associated with increased morbidity and early mortality.
• Income inequality, the ratio of household income at the 80th percentile to income at the 20th percentile, was lower in Carroll than NH and the U.S.
• Children in single-parent households declined in the past years and was below NH and the U.S.

Social & Economic OPPORTUNITIES
• The percent of adults with some college was lower than NH and similar to the U.S.
• The percentage of children in poverty was 18% in Carroll County, higher than NH but lower than the U.S.
• Injury deaths were higher than NH and the U.S.
• Lower median household income than NH and the U.S.
Physical Environment

Physical environment contains five measures in the category. Physical environment accounts for 10% of the county rankings. Carroll County ranked 5th out of 10 New Hampshire counties in physical environment.

Source: Drinking water violations – County Health Rankings; EPA, FY 2013-2014
Source: Severe housing problems – County Health Rankings; HUD Comprehensive Housing Affordability Strategy data, 2008-2012
Source: Driving alone to work and long commute – County Health Rankings: American Community Survey, 5-year estimates, 2010-2014

Source: Air pollution – County Health Rankings: CDC WONDER environmental data, 2010
Physical Environment STRENGTHS

- Carroll County had fewer air particulate matter in micrograms per cubic meter than NH and the U.S.

Physical Environment OPPORTUNITES

- There were drinking water violations in Carroll County. These statistics are prior to the Flint, MI water crisis.

In the other metrics, Carroll County was between NH and the U.S.

There were four broad themes that emerged in this process:

- Carroll County needs to create a “Culture of Health” which permeates throughout the towns, businesses, schools, and community organizations to engender total commitment to health improvement for all community members.
- There is a direct relationship between health outcomes and affluence (income and education) - the lower the income, the poorer the health outcomes.
- While any given measure may show an overall good picture of community health, there are significantly challenged subgroups in Carroll County.
- It will take a partnership with a wide range of organizations and citizens pooling resources to meaningfully impact the health of the community. Many assets already exist in the county to improve health.

## Prioritization Criteria

During Huggins Hospital's Community Health Summit, attendees identified and prioritized the most significant health needs in the community to be addressed in the next three-year period. The group used the criteria below to prioritize the health needs.

<table>
<thead>
<tr>
<th>Magnitude/scale of the problem</th>
<th>How big is the problem? How many people does the problem affect, either actually or potentially? In terms of human impact, how does it compare to other health issues?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Seriousness of Consequences</td>
<td>What degree of disability or premature death occurs because of this problem? What would happen if the issue were not made a priority? What is the level of burden on the community (economic, social or other)?</td>
</tr>
<tr>
<td>Feasibility</td>
<td>Is the problem preventable? How much change can be made? What is the community's capacity to address it? Are there available resources to address it sustainably? What's already being done, and is it working? What are the community's intrinsic barriers and how big are they to overcome?</td>
</tr>
</tbody>
</table>
The following needs were prioritized at the Community Health Summit. The groups brainstormed goals and actions to form the foundation of Carroll County’s health initiatives. Using a nominal group technique, each attendee posted their ideas of the top three health needs at the front of the room. The group, as a whole, then voted to establish priority. The results of the activity are below with higher numbers indicating the number of “votes” or priority by topic. The bullets below the health need are the actual comments received in writing.

1. Substance Abuse (42)
   - Substance abuse (4)
   - Substance misuse (2)
   - Addiction (2)
   - Substance abuse cure
   - Alcohol/drug addiction
   - Alcohol and drug abuse
   - Drugs and drug addiction
   - Substance misuse – alcohol, drugs
   - Alcohol and drug misuse across the lifespan
   - Substance abuse services
   - Drug abuse
   - Drug abuse prevention
   - Drug/alcohol issue
   - Heroin
   - Addiction to prescribed drugs, anti-depressant
   - Access to drug abuse/recovery programs
   - Drugs – low income
   - Acceptance of culture of alcohol misuse
   - Physicians’ recognition and diagnosing alcohol misuse in patients
   - Screening for substance abuse at PCP office by trained person/recovery coach
   - Easy accessibility of opioid prescriptions and providers
   - Access to mental health and substance abuse treatment

2. Mental Health (25)

3. Chronic diseases/prevention (19)

4. Access (16)

5. Senior/Aging Issues (12)

6. Obesity (12)

   - Excessive drinking, drugs, lack of mental health facilities
   - Lack of availability of detox – 1-5 days for heroin Opiates
   - Drug treatment recovery
   - Drug prevention and education training/instruction
   - Residential treatment availability or long term recovery
   - Substance misuse (behavioral health) alcohol, drug, prescription and street
   - Substance abuse among young, pregnant moms, causing drug-addiction in newborns
   - Substance abuse treatment/education
   - Access to drug abuse counseling and medical care
   - Health services, such as behavioral health to address smoking, drinking, substance abuse without increasing property tax to support these services/programs
   - Drug rehab programs/services
   - Substance abuse treatment programs for un/underinsured
   - Begin ambulatory detox with PCP assistance to safely detox at home for substances
• Need for recovery coaches – CRSW (licensed recovery support worker) at hospital to screen and coach with overdose/refer to local substance abuse therapy
• Substance abuse – urgent need county-wide, has economic social and financial burden to community, homelessness

2. Mental Health (25)
• Mental health (6)
• Behavioral health/mental health
• Depression/anxiety – mental health, need that afflicts lower income community
• People don't know where to get help – mental health, family services, health insurance
• Lack of mental health services for all issues
• Incorrect contact information for mental health people. Can't find help.
• Mental Health services (3)
• Lack of mental health care
• Mental health services – increase emergency care
• Mental health increase community-based care
• Suicide prevention and awareness
• Access to mental health facilities, Mental health support
• Access to mental health for all ages
• Access to mental health care
• Mental health issues in people living in the community that are unaddressed
• Mental Health – deterioration of mental health services in New Hampshire, upheaval in NH, lack of psychiatrist
• Facilities and care for mental health problems

3. Chronic diseases/prevention (19)
• Individual responsibility
• Promote healthy lifestyles
• Public education
• Faith involvement
• Combining and working together of all community agencies
• Community involvement

• Significant severe disruption/negative consequences for entire family/community
• Heart disease
• Injury prevention
• Accidental death (2)
• Chronic disease/obesity
• It would be nice to have daily walk in centers for treatment
• Health maintenance overall
• Wellness education
• Diabetes (2)
• Chronic health issues/sickness
• Nutrition education for specific diseases and basic health

4. Access (16)
• Lack of shelter (homeless)
• Increase access to care for those uninsured and underinsured through state funded free transportation
• Transportation
• Transportation for the elderly – additional
• Uniform electronic medical record, including prescription drugs to better track/identify population of prescription substance, increase communication among providers about patients
• Clear and concise billing with no secret charges
• Uninsured affects low income, homeless community
• Access to healthcare
• The cost of medical care is prohibitive even for the insured
• Children in poverty lack access to healthcare
• Access to affordable health/dental insurance
• It is important to have adequate cancer treatment in southern Carroll County
• Prenatal health/neonatal care
• Access to medication for patients (insurance companies, auth mandate prior)
• Uninsured and access to health care ability to pay for services they need
• Education about penalty for not having health insurance

5. Senior/Aging issues (12)
• Senior services
• Aging health issues
• Elder support
• Elder care
• Elder services
• Enough facilities to care for and house aging seniors
• Healthy aging
• Aging in place, respect for elders’ wishes
• Affordable care for seniors to stay home
• Housing, in-home supports for elderly/disabled mainly low income
• Current reimbursement for post-acute care has been reduced/eliminated in some cases
• Increasing elders – need more elder services, high population of nursing home patients, healthy aging options

6. Obesity (12)
• Obesity (10)
• Obesity in the young as a start

The most significant health needs resulted in six categories. Groups brainstormed goals and actions around the most important health needs listed above. These suggested goals and actions have been organized below.

Community Health Summit Brainstorming
Focus Areas and Goals

Substance Abuse

Goal 1 - Establish systematic drug education

Action 1 - Provide effective, age appropriate and systematic education at all levels

Action 2 - Engage medical community in identifying and screening for issue

Resources Needed:
• Include mental health
• Utilize existing resources and expand to schools, church and community
• Identify best practice and use a collaborative process
• Utilize public health and governor’s commission on alcohol/substance abuse
• Identify a community physician to champion
Goal 2 - Prevention

Action 1 – Comprehensive state plan (over the counter drugs) including all aspects of society
Action 2 – Develop a system for the identification of people who are predisposed to drug misuse
Action 3 – Develop a program for pregnant women

Resources Needed:
- Funding
- Trained personnel
- Facilities
- More professionals trained

Goal 3 - Recovery

Action 1 – Develop strong community and access to programs that are treatment based
Action 2 – Develop a recovery infrastructure involving treatment centers, counselors, and follow-up care.

Resources Needed:
- Reimbursement for treatment thru medical insurance
- Incentives treatment
- More extensive treatment facilities with a continuum of care (i.e. inpatient, outpatient follow-up)

Mental Health

Goal 1 - Increase access to psychiatric services especially acute care

Action 1 - Bring more psychiatrists into Carroll County
Action 2 - Advocate integration of mental health and primary care and pediatric physicians to refer to psych and APRNS.
Action 3 - Use suicide prevention programs that work
Action 4 - Link elderly population to mental health to reduce suicide risks

Resources Needed:
- Partner with other counties
- 1115 waiver
- Partner with existing programs
- Use programs like READ – Referral, Educate, Access to programs
- Get buy-in
Goal 2 - Identify a potential facility to use
Action 1 – Gather a grass roots group to put a clear plan together
Action 2 – Identify possible facilities
Action 3 – Present to legislators

Chronic disease/prevention

Goal 1 – Diabetes/cholesterol/stroke all increase with obesity – more awareness and education needed
Action 1 – Create population change through early childhood/school-based programs with gardens as well as ways to increase outdoor opportunities and decrease fear of natural environment
Action 2 – Increase activity in kids at school, decrease screen time

Goal 2 - Increase access to healthy foods
Action 1 - Sponsor community health clinic as part of food van
Action 2 - Bring community gardens to schools where people live
Action 3 - Mobile food van w/ SNAP eligibility
Action 4 - Use Carroll County farm property

Goals 3 - Affordable/transitional housing
Action 1 - Families in Transition already in process to address this issue
Action 2 - Increase education and awareness of challenges low income people face, poverty awareness workshops

Access

Goal 1 - Education and access to health insurance
Action 1 - Monthly insurance clinic to educate patients on what’s available
Action 2 - Train providers how to bring awareness to patients regarding insurance options

Resources Needed:
- Media – radio, TV, social media
**Senior/Aging Issues**

**Goal 1 - Attainability of Homecare**

- Action 1 - Health monitoring in-home
- Action 2 - Inform community/seniors about access/options

**Resources Needed:**
- Town nurse
- Emergency services a.m. call
- Community churches or other might be able to fill gaps
- Consider surveying this community and service providers

**Goal 2 - Services and supports (meals, housekeeping, transportation)**

- Action 1 - Increase options/workforce
- Action 2 - Agency/organization strategy to assess needs
- Action 3 - Transportation - consider surveying this community and service priorities
- Action 4 - Increase community engagement through assessment/exploring

**Resources Needed:**
- Needs more consideration
- ServiceLink
- Find gaps

**Goal 2 - Transportation**

- Action 1 - Develop regional transportation similar to Maine's RTP options
- Action 2 - Transportation between healthcare facilities

**Resources Needed:**
- Funding
- Cooperation with what is available (expanding) volunteers

**Goal 3 - Improve access to specialized care (prenatal, cancer, dialysis)**

- Action 1 - Collaboration with facilities that offer specialized care
- Action 2 - Telemedicine – video chat with a specialist

**Resources Needed:**
- Networking
- Transportation
- Education for patients
Goal 3 - Advance Care Planning

Action 1 - Marketing targeting baby boomers
Action 2 - Consider messaging and action to support legislation and funding for sustainable action
Action 3 - Make sure local government and public know about needs/benefits, etc.

Goal 1 - Raise awareness about obesity

Action 1 - Comprehensive list of community resources
Action 2 - Promote and market the list of resources

Resources Needed:
- Hospitals
- Public health
- Chamber
- Newspaper
- Schools
- Internet

Goal 2 - Reduce barriers to resources (time/cost/access)

Action 1 - Affordability – food, exercise
Action 2 - Use existing community services

Resources Needed:
- Dietician

Goal 3 - Education

Action 1 - Develop a strategy based on risk level of obesity
Action 2 - Social/emotional motivation
Huggins Hospital’s Selected Initiatives and Implementation Plan 2016

Implementation Plan 2016

To successfully make our community healthier, it was necessary to have a collaborative venture which brought together care providers, citizens, government, schools, non-profit organizations and businesses around an effective plan of action. Huggins Hospital will now select key elements of the assessment and develop strategies and initiatives to address those elements.

Based on the results of this CHNA, Huggins Hospital selected three (3) of the identified significant health needs to address.

1. **Chronic disease and obesity treatment and prevention**
2. **Healthy aging**
3. **Mental Health and Behavioral Health**

A separate document that includes lists of community assets and resources that can help improve the health of the community can be found on the hospital’s website at http://www.hugginshospital.org/assets/pdf/Huggins_Community_Asset_Inventory_2016.pdf or can be printed by request to the hospital’s Communication & Community Relations Department.

Community Asset Inventory
Community Health Needs Assessment
Carroll County, NH
May, 2016
2013 Huggins Hospital Implementation Plan/Impact Evaluation

Huggins Hospital adopted an implementation plan in 2013. The results of this plan were reviewed at the Community Health Summit.

The top health issues were:
- Behavioral/Mental Health
- Dental Care
- Obesity/Nutrition
- Diabetes
- Unintentional injury
- Elder Care
- Substance Abuse/Domestic Violence
- Access to Care
- Heart Disease

The Implementation Plan from 2013 was:
- Address gap in Health Insurance Coverage
- Improve access to Primary Care Providers
- Offer services to improve activity levels
- Offer services to improve heart health
- Offer services to for diabetes prevention and management
- Provide education for safety to prevent unintentional injury
- Provide access to domestic violence support in Wolfeboro area
- Support other organizations offering public transportation
With This Implementation Plan, Huggins Hospital:

- Employed Financial Assistance Counselors to help patients access health insurance and guide them through their options.
- Hired more primary care providers resulting in an improvement to the primary care provider and patient ratio.
- Built a new Primary Care facility in Alton, NH to make more patient appointment availability.
- Continued exercise programs and weight management education for the community.
- Continued to offer specialty services in cardiac care through a clinical relationship with Catholic Medical Center of Manchester, NH.
- Developed a new evidence-based diabetes program through the CDC.
- Educated the community about injury prevention through Falls Prevention programs.
- Provided space for Starting Point, a domestic and sexual violence support organization, within the hospital.
- Financially supported local transportation.

2013 Huggins Hospital CHNA and Implementation Plan Written Comments

At the community health summit, a worksheet asking for written comments was distributed to all participants. Written comments received were:

- Glad it included unintentional injury as a focus area
- The 2013 Plan, as I understand it, at both hospitals indicated need for increased mental health/behavioral health a priority. Neither hospital addressed it as a priority action because of lack of resources.
- Always ambitious, seems difficult to get a handle on it all.
- Should be measured (i.e. success or failure by year)
- More Community “follow-up” i.e. does our community know about the plan?
